## **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with Meghan Van Leeuwen on December 8, 2004.

The application has been amended as follows:

- 3. The title has been changed to "Overflow downdraw glass forming method and apparatus".
- 4. Claims 47-100 have been canceled without prejudice or disclaimer from a later filing of the same claims in a divisional application.
- 5. Claim 1 has been amended as follows:
  - 1. (Currently Amended) An improved apparatus for forming sheet glass, wherein the apparatus includes an inflow pipe for delivering molten glass, a trough for receiving molten glass that has sides attached to a wedged shaped sheet forming structure that has downwardly sloping sides converging at the bottom of the wedge such that a glass sheet is formed when molten glass flows over the sides of the trough, down the downwardly sloping sides of the wedged shaped sheet forming structure and meets at the bottom of wedge, and wherein the improvement comprises:

Page 2

Application/Control Number: 10/771,761

Art Unit: 1731

a downcomer pipe inserted vertically downward into an end of the inflow pipe opposite the trough, wherein a bottom of the downcomer pipe comprises at least

Page 3

one downward extension including one or more V-shaped or curved extensions,

which produces a controlled vortex flow of at least a portion of a glass stream

exiting the downcomer pipe, directing at least a portion of the glass stream into a

specific location.

6. Claim 18 has been amended as follows:

18. (Currently Amended) A method for manufacturing glass sheets using an

apparatus that includes a trough for receiving molten glass that has sides

attached to a wedged shaped sheet forming structure that has downwardly

sloping sides converging at the bottom of the wedge such that a glass sheet is

formed when molten glass flows over the sides of the trough, down the

downwardly sloping sides of the wedged shaped sheet forming structure and

meets at the bottom of wedge, wherein the method comprises the step of:

altering a flow path of at least a portion of a molten glass stream, wherein a

bottom of a downcomer pipe comprises at least one downward extension

including one or more V-shaped or curved extensions, which produces a

controlled vortex flow of at least a portion of the glass stream exiting the

Application/Control Number: 10/771,761 Page 4

Art Unit: 1731

downcomer pipe, directing at least a portion of the glass stream into a specific

location.

7. The following is an examiner's statement of reasons for allowance: The prior art does not teach or fairly suggest apparatus for forming sheet glass as claimed having any of the following

features:

a. The bottom of a downcomer pipe comprising one or more V-shaped or curved

extensions as claimed

b. A bead guide as claimed

c. The downcomer pipe not centered with the centerline of the inflow pipe as

claimed

d. The bottom of a downcomer pipe cut at an angle to the centerline of the

downcomer pipe as claimed

e. An inlet end glass seal structure designed as claimed.

8. The prior art does not teach or fairly suggest methods for manufacturing glass sheets as

claimed including one of the following features:

f. The bottom of a downcomer pipe comprising one or more V-shaped or curved

extensions as claimed

g. Moving the inflow pipe relative to the downcomer pipe such that the pipes are off

center as claimed.

Application/Control Number: 10/771,761 Page 5

Art Unit: 1731

9. It would not have been obvious to incorporate the above features into the apparatus and methods of the prior art.

- 10. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
- 11. The information disclosure statements from the parent file 10/214,904 have been considered and the reference listings transferred from the parent file into this file.
- 12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sean E. Vincent whose telephone number is (571) 272-1194. The examiner can normally be reached on M F (8:30 6:00).
- 13. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Steven P. Griffin can be reached on (571) 272-1189. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
- 14. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 8664217 19197 (toll-free).
